

# Infant Equipment and Supplies

(6 weeks through 15 mos.)

One Form per Classroom

<b>Program Name:</b>	<b>Address, City, State, Zip:</b>	<b>License Number:</b>	<b>Room Capacity:</b>
----------------------	-----------------------------------	------------------------	-----------------------

To complete this form, please refer to Minnesota Rules, part 9503.0060, to determine the description and numbers of equipment required for this age group. Equipment must be age appropriate and address any special needs of children served. The center must have enough equipment for the number of children for which the center is licensed. If equipment is rotated among groups of children, there must be enough to serve the maximum group size of the age group using the equipment and the rotation must be shown on the daily schedule in the child care program plan. Equipment must be in good repair and accessible for use by the children during hours of operation each day. Accessible means that the equipment is stored in a location where children themselves are able to reach and use the equipment.
