

Default Managed Care Enrollment Process:

- Enrollees currently in a health plan that remains available in their county of residence that do not request a change in plan during Annual Health Plan Selection (AHPs) will remain enrolled in their current health plan.
- Enrollees who are currently enrolled in a health plan that will no longer be available in their county of residence who do not select a new plan during AHPs will be assigned to a default health plan. The default will be based on the recipient's county of residence and the logic listed in the default assignment chart below.
- Newly eligible Medical Assistance (PMAP) or MinnesotaCare recipients who have not been enrolled in managed care within the past 12 months who do not make a health plan selection will be enrolled into a plan based on their county of residence and the logic listed in the default assignment chart below.
- Special Needs BasicCare (SNBC) is a voluntary managed care program. The MCO default assignment process will be used when the member has not opted out of managed care. SNBC enrollees may choose to prospectively dis-enroll at the end of any month.
